- English pre-intermediate | in progress
- Russian

LIS ULADZIMIR

PERSONAL PROFILE

I'm a result oriented frontend developer with experience in creating Landing Pages and SPA, using React(JS/TS), Redux, HTML & CSS.

Now I am improving my skills in this direction and expanding them with new technologies.

My free time is dedicated to solving katas on Codewars and boosting my English. After working as a freelancer, I would like to find a project work/full-time job in a creative company with up-to-date task and collaborative team!

WORK EXPERIENCE

- React development using redux, React-redux, react-router-dom, redux-thunk, redux-toolkit, Axios, Formik.
- Using next developer technologies: React/Redux/ReduxThunk/RestAPI/Axios/Formik/MaterialUI/SCSS, etc
- Checking the correctness of the code with Unit Tests, applying Storybook for demonstration of individual modules of the application. Using TypeScript for the best code control during development.
